Forecast for Wednesday 25 Aug 2021

Weather: Any early low cloud and hill fog will rise above the summits by mid-morning. The rest of Wednesday will be dry and bright. Although there will be more cloud around than on Tuesday, some good sunny spells likely in the afternoon.

Chance of cloud free mountain/hill tops above 600m: 40% with cloud likely down to about 400m at first. Becoming 90% from mid-morning with a small chance of patchy cloud near the summits.

Visibility: Generally good with fine views of distant hills up to 30km away. Early low cloud may cover hills down to 400m, so hill fog on the summits may lower visibility to 200m.

Freezing Level*	2800m	2900m	3400m	3400m	3400m	3300m	3100m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

The light wind speeds and warm temperatures in the chart look realistic. Temperatures in sheltered valleys may rise a few degrees higher than shown, perhaps reaching 21 Celsius. UV levels are moderate, but even so, sun protection is recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Thursday 26 Aug 2021

Weather: Low cloud and hill fog will persist longer on Thursday morning as a weak weather front passes over. However, the weather will stay dry throughout, and cloud will rise above the summits by early afternoon, leaving dry, bright and warm conditions with light winds.

Maximum wind: North-easterly 15-20 mph above 600m on Thursday morning.

Chance of cloud free mountain/hill tops above 600m: 30%, becoming 90% by afternoon.

Visibility: Morning low cloud may cover hills to 300m or so above sea level, so hill fog may lower visibility to 200m or so until noon. In the afternoon, visibility will be generally good with fine views of distant hills up to 30km away.

Temperature: **Valleys:** 11 Celsius at dawn rising to 21 Celsius in the afternoon.
At 600m: 10 Celsius at dawn rising to 16 Celsius in the afternoon.
Freezing level: Well above the summits.
